

# BETON - Mechanical concrete strength tester

---

## Product description:

### Mechanical concrete strength tester

#### Propriétés

- Measures the strength of concrete (concrete and reinforced concrete) without damaging the substrate by the rebound method.
- Direct reading with dial and conversion table on the back of the device.

#### Delivered with

storage case, grinding stone, screwdriver, spring and user manual.

---

## Product features:

Plage de mesure :

10-60 MPa

---

Operating Temperature Feature :	<b>-5 °C... +40 °C</b>
Relative accuracy :	<b>20 %</b>
Scale value :	<b>2 units</b>
Impact energy :	<b>sup. 1,8 J</b>
Spring compression force :	<b>70 N</b>
Hardness of flip road and impact hammer working surfaces :	<b>HRC 59-63</b>
Spherical radius of flip rod :	<b>(25±5) mm</b>
